

Trends in Technology and Analysis

Sooa Han

Dec 17, 2022

OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- In this report, we focus on:
 - Comparison between future and current technology
 - Programming language trends
 - Database trends
 - Platform trends
 - Demographics of developers
 - Technological gap in countries
 - Gender gap in jobs

INTRODUCTION

- Keeping abreast of the latest technology trends enables us to invest time and resources in the right tools and talents to drive better performance and/or business results
- Target Audience: IT Professionals and anyone interested in IT field
- Learning objectives:
 - To identify the top technologies in demand
 - To identify the latest technology trends
 - To identify the need to update skills and knowledge to catch up with the trends
 - To identify any potential issues in the technology industry
 - To identify the next steps IT professionals need to undertake
 - To help identify future skill requirements

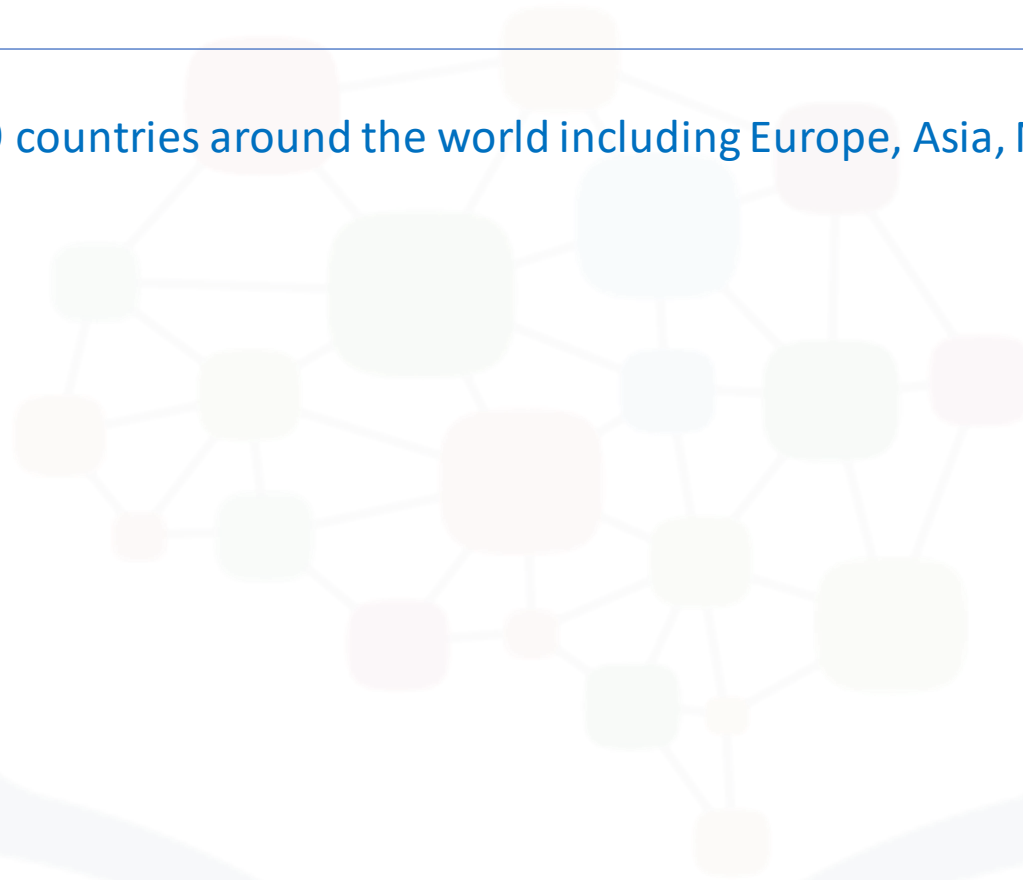

METHODOLOGY

- Data Collection Sources:
 - Stack Overflow Developer 2019 Survey
 - GitHub Job Postings
 - Programming Languages Annual Salary
- Data Wrangling
- Exploratory Data Analysis
- Data Visualization
 - Python matplotlib.pyplot
 - Python pandas
 - IBM Cognos Dashboard

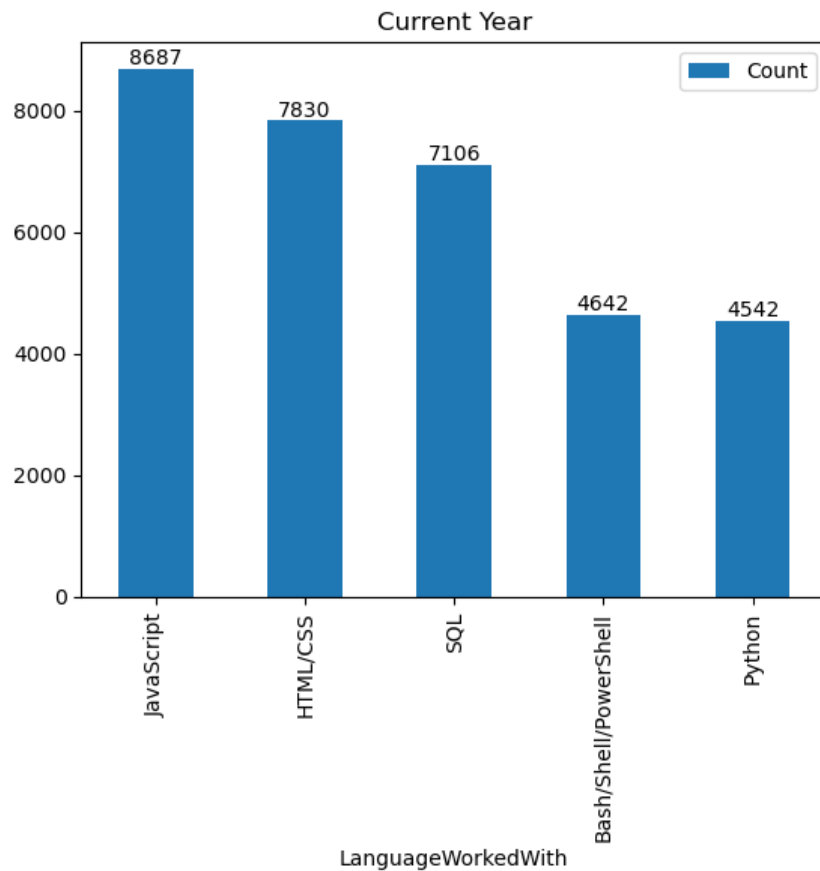

RESULTS

Respondents are from 179 countries around the world including Europe, Asia, North America, South America, Africa, Australia

PROGRAMMING LANGUAGE TRENDS

Current Year

Next Year

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

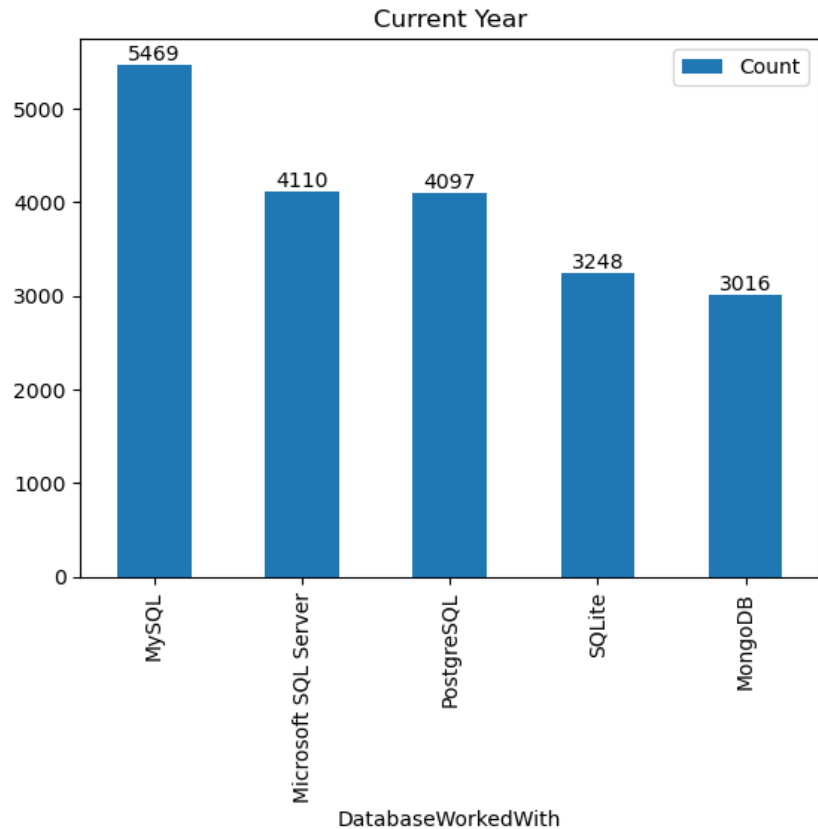

- Python is programming language with fast-growing popularity
- JavaScript is the most in demand programming language, followed by HTML/CSS
- JavaScript, HTML/CSS, SQL, and Python remain in top 5
- Skills in TypeScript is more desirable than Bash/Shell/PowerShell for next year

Implications

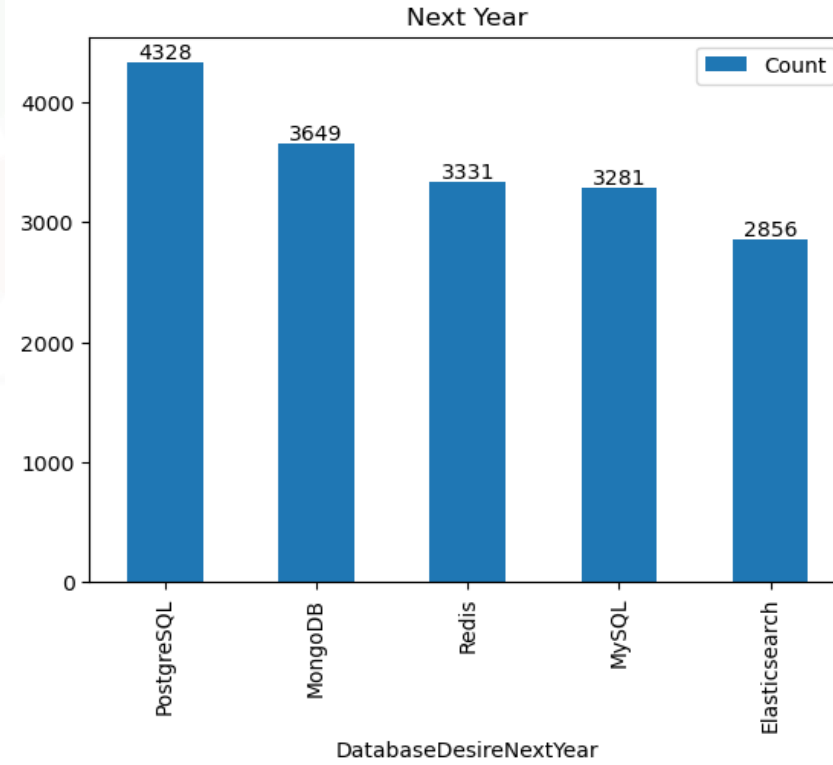

- Python's increase in demand may overtake JavaScript in the future
- Web development remains in high demand

DATABASE TRENDS

Current Year

Next Year

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- Postgre and MongoDB have an increase in demand
- MySQL has a decrease in demand for next year
- Skills in Redis and ElasticSearch are more desirable than Microsoft SQL Server and SQLite for next year

Implications

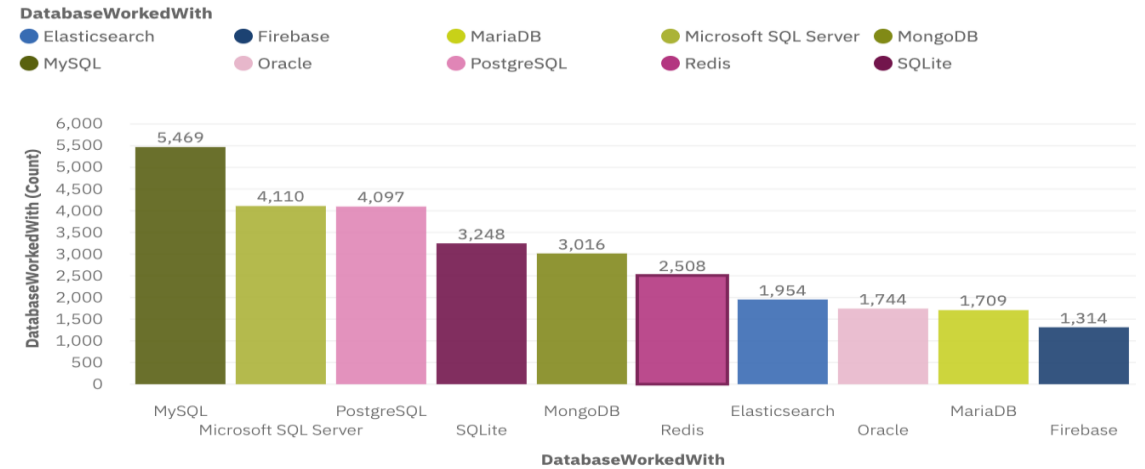

- Open source databases are preferred
- Demand is volatile

DISCUSSION

- New technology constantly emerges leading to changes in demand
- The IT industry needs to diversify in order to eliminate gender gap

OVERALL FINDINGS & IMPLICATIONS

Findings

- The most popular technologies in the current year are JavaScript, Windows, MySQL, and jQuery
- Popularity of MySQL significantly drops for next year
- PostgreSQL, MongoDB, and Redis have an increase in demand
- SQL Server has been edged out with Redis and Elasticsearch included in top 3 database desire next year
- Linux and Docker are consistently in demand
- The vast majority of developers are males, accounting for 93.7% of all respondents. Female developers amounted to only 6.4% of all respondents, demonstrating the male-dominating reality of software development jobs.
- Most of the developers are mid- or late- 20s and have bachelor's degree
- Fast-changing technology every year
- Trends and demands fluctuate based on new technologies

Implications

- Python may soon catch up with HTML/CSS and possibly with JavaScript based on its fast-growing trend
- Although JavaScript and HTML/CSS remains the top 2 in-demand programming languages, their popularity are dropping
- Web development remains high in demand
- Open source databases are preferred
- Demand is volatile
- IT professionals and companies have to learn and adapt to changing demands
- Low population of female developers indicate the problem of inclusion in tech industry

CONCLUSION

- JavaScript remains as the most demanded programming language, followed by HTML/CSS.
- Python currently is the fastest-growing programming language
- Popularity and demand are volatile and change quickly
- New technology leads to different trends and demands
- The IT industry needs to find ways to diversify
